

Biscayne Bay
Surface Water Improvement and Management
(SWIM) Plan
Planning Document

South Florida Water Management District
West Palm Beach, Florida
November 1995

In a continuing effort by the South Florida Water Management District (SFWMD) to reach as much of the public as possible, the Florida Marine Research Institute (FMRI) and the Florida Department of Environmental Protection created this Website, which is now being maintained by SFWMD.

This document is the HTML version of the 1995 Biscayne Bay Surface Water Improvement and Management (SWIM) Plan. While portions of the original plan have been incorporated, this document replaces the 1988 plan. The purpose of this plan is to evaluate the effectiveness of initial strategies, identify new issues and opportunities facing the bay, and develop goals, objectives, strategies and projects to address these items. Solutions may involve continuing current efforts, changing ongoing projects or initiating new actions.

The plan consists of two volumes. Included here is the Planning Document only. A Technical Supporting Document including appendices is available in hard copy only. To obtain a hard copy version of the Biscayne Bay SWIM Plan *Planning Document* or a copy of the Biscayne Bay SWIM Plan *Technical Supporting Document and Appendices* please contact:
